Sample **Fortified Kandy Kush P**

Sample ID SD220817-051 (51177)

Matrix Flower (Inhalable Cannabis Good)

Sampled - Received Aug 17, 2022
 Analyses executed CAN20

Reported Aug 19, 2022

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.85% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-d8-THC or d9-THC. At this time there are no reference standards available for (+)-d8-THC. (+)-d8-THC is a different compound from the main (-)-d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-d8-THC and d9-THC with the majority, if not all, of the concentration being (+)-d8-THC. Total (+/-) D8 Concentration is estimated to be 5.65%
